

Exercise 4

Develop a program to create a shopping list:

1. Create an empty list call `shoppingList`
2. Use a for loop to ask the user to input 5 items into the list `shoppingItem`
3. On each iteration of the input, append `shoppingItem` to `shoppingList`
4. After completing 5 times of input,
 - a. Sort the `shoppingList`
 - b. Use another 'for' loop to print the `shoppingList`
5. Output should look like this:

```
Enter item 1: milk
```

```
Enter item 2: bread
```

```
Enter item 3: eggs
```

```
Enter item 4: apples
```

```
Enter item 5: cereal
```

```
Your shopping list is: ['apples', 'bread',  
'cereal', 'eggs', 'milk']
```

Hints:

To sort the shopping list:

```
shoppingList.sort()
```
